Aussie Mushrooms Oyster Grow Kit - 100% Australian Made-

Pleurotus Oyster - All Colours

If you are not ready to start your kit, keep it in your fridge until you are ready (up to 2 months)

Step 1, Remove Bag from box and cut the top corner open of the bag

Step 2, Fill with Water until block is submerged in water (or floating)
Allow to soak for 24 hours

Step 3, Drain the excess water out of the bag, and replace the Bag inside the box
Then roll the plastic up to seal the top of the bag.

Step 4, Close the top of the box and remove the front panel from box
cut a large X in the bag about the size of the box window
Place kit somewhere humid EG bathroom or laundry with the door shut

Step 5, Mist the plastic bag where you made your X 2 - 3 times per day

After a few weeks you should start to see small pins forming,
these will turn into your mushrooms

the best time to pick your mushrooms is just before the cap rolls upwards

Best fruiting Temp is 18 - 26 Deg

**Or the best way to fruit mushrooms - see our making a mushroom terrarium guide
with a mushroom terrarium you rarely need to mist with water
see last picture of some mushrooms growing inside a terrarium**
