## **Aussie Mushrooms Grow Kit - 100% Australian Made**

### **Shiitake *Lentinula edodes* (High Yield Strain)**

If your not ready to start your kit keep it in your fridge until you are ready (up to 2 months)

Step 1, Cut the top off the bag and fill with Cold Water until the Block is submerged

let the Log soak in the water for 12 hours,

(put something heavy on the Log so its submerged in the water)

Step 2, put a Brick in a large bucket or container and some water in the Bottom no more than Half way up the brick,

Sit your log on the Brick out of the water as pictured below, and cover the top of the Bucket with some plastic leave a small gap for air exchange (approx 20%)

Mist with water 2 times per day, Keep the walls of your bucket wet and your log moist, when the mushrooms start to form do not spray the mushrooms directly

When your mushrooms are grown,

Cut them off as close to the block as possible

Allow your block to rest somewhere dry

for about 14 days and then repeat from Step 1 Soaking the block

You should get 2-4 flushes of mushrooms depending on your conditions

Or the best way to fruit - see our making a mushroom terrarium with a mushroom terrarium remove block from bag after soak and sit on foil inside your terrarium
